## PROFESSIONAL SUMMARY

**MERN Stack Developer** in **React.js, MongoDB, Express.js and Node.js**, backed by good programming skills in **JavaScript, TypeScript, Java, CodeIgniter4, PHP**. Strong communicator with a track record of meeting project goals and exceeding client expectations. Successfully delivered projects like **ISACA Chanpter, HutsOFDeals (An Ecommerce Website), wiki, Respondo.io, iDigitize HRMS, Avabai** leveraging the power of the MERN stack to streamline processes, enhance efficiency, and improve customer experiences. **Ready to contribute to your organization's success and drive impactful solutions.**

## SKILLS AND ACCOMPLISHMENTS

- **MERN Stack Development:** MongoDB | Express.js | React.js | Node.js
- **Java Development:** Java | Advance Java | Hibernate | Maven and Gradle
- **Programming Languages:** JavaScript | TypeScript | Java | PHP
- **Frontend Development:** React JS | HTML5 | CSS3 | Bootstrap | jQuery | ES6 | React-Redux-Toopkit
- **Backend Development:** Node.js | Java | CodeIgniter 4 | Express.js | Strong grasp of OOPs | Data Structures | Data Algorithms | Postman | Experienced with Linux and Ubuntu OS
- **Databases:** MySQL | MongoDB
- **Version Control & Collaboration:** Git | GitHub | Gitlab
- **Web Design & Development:** Web Designing | Web Development | REST API | JSON | HTTP
- **Code Quality:** ESLint | Prettier
- **Other Skills:** Agile Development - Scrum | NPM | Babel | Jira
- **Problem-Solving:** Strong analytical skills for resolving complex technical challenges.
- **Communication:** Effective collaboration and communication with teams, stakeholders, and clients, ensuring project success.
- **Continuous Learning:** Proactive in staying updated with emerging technologies and industry trends to drive innovation.

## WORK EXPERIENCE

**Network Engineer L1 | NTT Global Data Centers, Vikhroli** (04/2023) – (Present)  
Worked in a **shared NOC** (Network Operations Center), managing and **troubleshooting LAN/WAN** networks for multiple **international clients**, including those from Singapore and the US.

### Responsibilities:

- Monitored network performance using tools like **Checkmk** and **Logic Monitor**, ensuring seamless operations and proactive issue identification.
- Utilized **ServiceNow** (SNOW) to efficiently track, manage, and resolve tickets, prioritizing critical incidents and escalating complex issues..
- Performed key configuration tasks such as adding **MAC addresses**, conducting **router** and **F5** device backups, and executing regular device **health checks**.
- Provided exceptional customer support, offering troubleshooting and guidance to swiftly resolve technical issues.

- Collaborated with **ISPs** to resolve connectivity issues, ensuring minimal downtime and uninterrupted services for clients.
- Ensured compliance with **security policies** while maintaining documentation and reporting for network changes and incident logs.
- Collaborated with L2/L3 engineers on escalated issues and contributed to **knowledge-sharing initiatives**.
- Gained practical experience with **Linux** operating systems, enhancing troubleshooting efficiency and technical proficiency.

#### Software Developer | iDigitize Infotech LLP, Andheri

(10/2023) – (04/2024)

Developed and implemented **REST APIs** for multiple projects, including **HutsOFDeals** (Ecommerce Website), **Respondo.io** (Reply Network), **HRMS projects**, **Avabai** (Inventory Management Website), and **ISACA Chapters**.

#### Responsibilities:

- Designed and developed **database schemas**, built authentication systems, and implemented **role-based authorization** for the **ISACA Chapters** and **HRMS projects**, enhancing data security with **JWT** (Refresh and Access Tokens).
- Created **migration files** and performed database migrations, optimizing workflows and saving significant time.
- Conducted thorough **API testing** to ensure reliability, performance, and functionality.
- Played a key role in optimizing a **Python-based Leaf Disease Detection model**, achieving **89% accuracy** using **OpenCV** for advanced image processing.

#### CRM Developer | ProMX, Borivali

(09/2022) – (10/2022)

I have valuable work experience at ProMX in Borivali, Mumbai where I worked with **Microsoft Dynamics 365**, a robust suite of business applications aimed at enhancing various facets of organizational operations, including sales, customer service, marketing, finance, operations, Managing leads, and opportunities, Sales process automation, etc.

## PROJECTS

#### Project 1 | TechAlien - An E-Commerce Website

(12/2022) – (04/2023)

Developed an Electronics E-commerce Website utilizing a tech stack encompassing **HTML**, **CSS**, **Bootstrap**, **PHP**, and **MySQL**. the project allows customers to explore product categories, add items to their cart, proceed through a checkout process, and make **online payments ( Razorpay intigration)**. Additionally, the system includes an **invoice generation** feature and a password recovery mechanism facilitated by **SMTP**. From an administrative standpoint, the system supports essential **CRUD** operations. Administrators can monitor sales data, track the number of products and users, manage product listings and categories, and even add new administrators for system oversight.

#### Project 2 | Expense Tracker

(09/2023)

Developed Java-based Online Expense Tracker systems using a combination of **JSP**, **Servlet**, **JSTL**, and **Hibernate frameworks**. My projects adhere to the **Model-View-Controller (MVC)** architecture and leverage Maven for efficient project management. Implementing essential features such as **CRUD** Operations on Expense and user-friendly login and registration modules Integrated with **MySQL** database, optimizing database schemas, and executing SQL queries for seamless data retrieval and storage.

### Project 3 | Todoer

(09/2024)

The todoer npm CLI package is a user-friendly command-line interface tool designed to manage your todo tasks efficiently. With todoer, you can easily create, read, update, and delete tasks directly from your terminal, streamlining your productivity workflow.

### Project 4 | Student Management System

(07/2023)

Designed and developed a Student Management System leveraging **Java**, **Servlets**, and **JDBC** with **MySQL** database and Implemented the Factory Design Pattern for scalable and maintainable code architecture.

### Project Showcase

A curated selection of projects demonstrating interest in development. Each project highlights specific skills in frontend and backend development, database management, and responsive design.

## EDUCATION

### BSc (Bachelor of Science) in Information Technology

Aug 2020 – May 2023

Sathaye College, Mumbai University, Maharashtra

Achieved an **8.68 CGPA**

### HSC (Science and Information Technology)

Jun 2018 – Mar 2020

Utkarsha Vidhyalaya, Mumbai University, Maharashtra

Attained a **70.46%**

### SSC

Apr 2017 – Mar 2018

ST. Peter's High School, Mumbai University, Maharashtra

Secured an **85.00%**

## CERTIFICATIONS

- React and NodeJs Essential Training
- Enterprise Java with Spring Boot
- Java from Zero to First Job, Practical Guide, 2000+ examples.
- Java Collections Framework + Generics, Lambdas & Stream API.
- Learning Linux Command Line

## ACHIEVEMENTS

- Earned a **5-star Gold Badge** in **Java** programming on **HackerRank**, showcasing advanced programming skills.
- Secured a prestigious **Bronze Badge** on **CodeChef**, substantiating strong problem-solving and a deep understanding of algorithmic complexities.
- Orchestrated a highly productive job fair and Career Development Workshops during "Byte IT," connecting students with leading industry professionals and creating valuable career opportunities.
